

How to use Cafflano Go-Brew

- 1 Water/Beverage Bottle
- 2 Take-away Cup/Bottle

- 3 Pour-over Set
Screw off Cap & Drinker, turn it over, and put onto Cup. (Single or Double Cup)

- + Single Cup
Put a paper filter into Drinker, and start brewing (270mL)

- + Double Cup
Lift up Cup Sleeve to increase the capacity, put a paper filter into Drinker and start brewing (380mL)

Cap (Polypropylene, Silicon)
· Bottle cap to seal
· Stand for the extra cup when Drinker is turned over

Drinker (Bioplastic ECOZEN, Silicon)
· The top half of Go-Brew is transformed to a dripper when turned over
· Detachable structure makes it easy to clean

Stand / Cup Sleeve (Polypropylene)
· Cup Sleeve becomes coffee Stand when lifted, and enables double cup brewing

Cup (Bioplastic ECOZEN)
· Serves Single (270mL) or Double cup (380mL)

Paper Filter
· 25 free paperfilters included

· Paper Filters

CAFFLANO KLASSIC

ALL-IN-ONE POUR-OVER COFFEE MAKER

CAFFLANO KLASSIC, a new concept coffee maker with all functions together

- + Drip Kettle
- + Foldaway Hand-mill Grinder
- + Stainless Filter Dripper
- + Tumbler

- Drip Kettle & Cover (Polypropylene)**
- Specially designed spout hole makes it easy to pour hot water
 - Works just like a professional drip kettle
 - No scale needed due to bespoke capacity (270ml)
 - Detachable cover can be used as a lid for tumbler/drip kettle & a tray for grinder

- Foldaway Hand-mill Grinder (Ceramic, Stainless steel & Polypropylene)**
- Uniquely designed foldable handle occupies minimal space
 - Burr type hand-mill guarantees consistent, durable & stable performance
 - Easily cleaned with water
 - Fully adjustable grind size

- Stainless Filter Dripper (Stainless steel & Polypropylene)**
- Permanent and easily washable stainless steel filter
 - Etching processed fine holes
 - Natural brewing with air-vent design
 - Reusable & eco-friendly design

- Tumbler (Stainless steel, Polypropylene & Silicon)**
- Combined functions of drip server and tumbler during and after brewing
 - Bottom silicon-pad prevents slipping
 - Recommended capacity : 250ml (single cup)
 - Maximal capacity : 450ml (double cups)
 - Reusable & eco-friendly design

CAFFLANO KOMPRESSO

AUTHENTIC ESPRESSO MAKER

CONSUMER EQUIPMENT
NON-ELECTRICAL

How to use Cafflano Kompresso

- Piston (Polypropylene, Silicon)**
- Piston is assembled with chamber and used for generating pressure by pushing lower handles

- Chamber (PES)**
- The graduated cylinder Chamber is made of eco-friendly material and used to hold hot water.
 - A scale is engraved to measure the accurate volume of water (30ml ~ 60ml)

- Shower Screen (Stainless Steel, Silicon)**
- Shower Screen helps disperse hot water stream evenly and works as a gasket when assembled between Chamber and Filter Basket

- Filter Basket (Polypropylene, Stainless Steel)**
- Filter Basket holds ground beans
 - Hot water is pushed through the Shower Screen, ground beans and extracted through the stainless filter of Filter Basket

- Tamping Scoop (Polypropylene)**
- Tamping Scoop is the container to scoop ground beans and pour them into Filter Basket.
 - Its bottom face is used to tamp ground beans

- Cup (Bioplastic PETG)**
- Cup holds the extracted espresso

CAFFLANO KOMPACT

IMMERSION COFFEE BREWER

All materials (Polypropylene, Silicon, and Stainless steel) used for Cafflano Kompact are BPA free and commonly-used materials for baby milk bottles and medical supplies.

How to use Cafflano Kompact

- + Be cautious to add adequate amount of water (especially hot water) as brewed coffee may overflow due to coffee bloom
- + Brewing time may differ depending on types of roasted beans, customers' tastes and various circumstances
- + Gently agitate with Micro Filter covered, stir with a spoon or other utensil may help reduce brewing time
- + Be cautious as brewed coffee may spill while flipping over Cafflano Kompact for extraction

- Airlock (Polypropylene)**
- Airlock seals off the Bellows Chamber to prevent leakage and enhances the portability when compressed
 - ⚠ Caution : Do not seal Airlock after putting in hot water
 - Bellows Chamber may expand and result in a disconnected Press Guide

- Micro Filter (Polypropylene, Stainless steel)**
- Eco-friendly filter made with long-lasting stainless steel
 - It is convenient and easy-to-use when brewing, storing and cleaning

- Pulling Plate (Polypropylene)**
- Pulling Plate helps pressing safely and functions as a stable prop to be placed on top of a vessel (cup or tumbler) when extracting coffee by pressing or squeezing

- Press Guide (Polypropylene, Acryl)**
- Press Guide supports the Bellows Chamber and prevents it from moving or swaying so that the user is protected from potential danger of heat and other circumstances that may occur during extraction

- Bellows Chamber (Silicon)**
- Bellows Chamber works as a compressor in which ground beans and water are mixed and infused.
 - After appropriate infusing time, brewed coffee can be easily extracted by pressing the Bellows Chamber
 - Bellows enable the maximum transmission of power while pressing with minimal force
 - This creates an enhanced, easy extraction.
 - The unit can be compressed by pressing down and sealed with Airlock, making it easy to transport

CAFFLANO KRINDER

METAL-BURR COFFEE GRINDER

- + Effortless grinding : Ergonomic design (30g capacity)
- + Espresso to French press : A maintenance-free slide-bearing system secures the grind consistency
- + Precision-cut hardened steel burrs : Sharp edge-holding capabilities (edge retention)
- + Intuitive and easy grind setting : number tracking
- + World's lightest metal-burr grinder : only 295g
- + The maximum portability : Knob lock & crank hook for Handle
- + Affordable and cost-effective
