

Glasslock has its genuine glass tempering technology, known as Tempermax Technology, to maximize its durability and heat-resistance ability from -20°C to 230°C. Glasslock, four-sided latched food container, is also airtight and microwave-safe food container that does not generate any harmful chemical emission from itself unlike other plastic food containers. So, feel free to use Glasslock food container even when you enjoy delicious hot meal.

All products are eco-friendly products that are made with natural soda ash glass to reduce CO₂ emission and allow recycling after use.

The product specifications in this catalogue are based on the product with a lid.

Glasslock Container

The airtight containers with locks on all four sides and anti-slip design for safe use. Comes in various sizes from 120ml to 6,000ml and various shapes, including rectangular, square, and round shapes.

TEMPERMAX™

TEMPERMAX is a trademark that represents a distinctive glass tempering technique of Samkwang Glass Co., Ltd. TEMPERMAX technology has been applied to well-made Glasslock which has outstanding toughness and ability to endure extreme thermal resistance unlike imitations.

T.X Tempermax Glass **N.T** Non-tempered Glass

Basic type

Lid-PP | Gasket-Silicone

The very first airtight, heat-resistant tempered glass container and the signature products of Glasslock that are most popular.

Steady-seller

The steady-selling Glasslock products that have been most popular.

Airtight

Airtight with the silicone on the lid and the locking wings on all four sides.

Pure type

Lid-SK640(PS) | Hinge-PP | Gasket-Silicone

Pure, loved by consumers with even more advanced functions.

Clear lids

Pure's lids are clear to make it easier to see what is contained inside.

Smart lids

The detachable wings and silicone gaskets make it easier to wash and clean.

Airtight

Airtight with the silicone on the lid and the locking wings on all four sides.

Air type

Lid- PP | Gasket-Silicone

Convenient to use in a microwave with the steam-hole feature.

Convenient to use in a microwave with the steam-hole feature

The steam hole vents air to use in a microwave without opening the lid.

Airtight

Airtight with the silicone on the lid and the locking wings on all four sides.

Fancy type

Lid-PP | Gasket-Silicone

Thin and transparent Fancy Lid for higher convenience and visual satisfaction.

More transparent lids

Fancy's lids are transparent to make it easier to see what is contained inside.

Airtight

Airtight with the silicone on the lid and the locking wings on all four sides.

No worries about mixing side dishes

Because only the same kinds of side dishes are stored, the smell does not mix with food, so it can be used neatly.

Different color lid for easy identification of contents

Depending on the meat, seafood and vegetable materials, food can be stored separately in 3 different color of the lid.

Easy open type

Lid-LDPE

Convenient one-touch cap that can be opened and closed easily.

Convenient one-touch cap

Convenient one-touch cap can be opened and closed easily.

Fridge tidy up organizer

It is easy to store by applying a groove on the top of the cap for tidy up refrigerator containers.

Heritage

Multipurpose

Etique is the tableware brand of SamKwang Glass. Etique is a compound word of elegant and boutique, and it expresses the elegance and specialty of glass that can be lasted and preserved for a longtime. The concept of Etique started from the idea "Let glass makes your lifestyle at home happy", and it changes your small space stylishly.

Etique

Etique is a total glassware that allows you to make a table special with a variety of designs, beyond the original function of the product. Have a great day with Etique.

Etique N.T

Etique makes your valuable space classically and elegantly.
