

NEBO®
INNOVATIVE LIGHTING

2019

SPRING / SUMMER

We are one of the world's best-selling lines of innovative, consumer-friendly flashlights and tools.

Ever-changing and never compromising, we create and see our products through every phase of development. From the concept to consumer, we offer quality and customer service guarantees that are unmatched.

6 million+ sold per year

With over 30,000 retail customers, we get instant market feedback on up-take and trends giving us unparalleled insight leading to the competitive edge in development.

Innovation & retail value

We bring cutting edge design with high lumen output to our line. Our established retails create a value proposition without jeopardising quality or product integrity.

International Patents

This secures our place in the market and brings protection to our customers and products from counterfeit threats.

Global distribution

NEBO® is a division of Alliance Consumer Group (ACG), with headquarters in Grand Prairie, TX, USA. True Brands Ltd is a UK based wholly owned subsidiary of ACG, handling the global distribution and selling of NEBO® products throughout the world.

Top 5 Customers

Wal-Mart (30 yrs), Dicks Sporting Goods (4 yrs), Academy Sports (3 yrs), Bass Pro Shops (6 yrs), Sears Holding Corp. (25 yrs)

Proven business model

Solid dependable capacity working with some of the largest factories in the Far East delivering the highest quality.

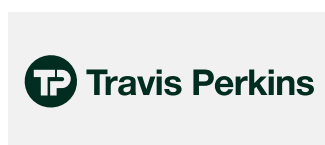

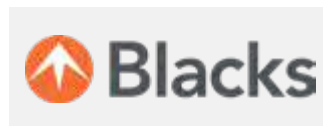

NEBO® IN THE MARKET

As technology progresses, consumers are coming to expect better value for their money.

There is a focus on reducing energy consumption and a heavier focus on "green" living overall. High Powered LED's, lens technology and rechargeable flashlights are all utilities that we have incorporated into our assortment, and we are always learning and discovering other innovative ways to better our value at consumer level.

NEBO® flashlights deliver optimum performance. Products are of the highest quality, innovatively designed, with special features and patented technology. Eye-catching packaging, clever point of sale and interactive TRY ME features set them apart from many of the more expensive, less innovative major brands and the many sub-standard low cost brands. In this way, we have carved out market positioning that has enabled the brand to continually increase market share and grow into one of the largest flashlight brands in the world.

Where we sell

THE NEW RELEASES

SPRING / SUMMER 2019

NEBO® COUNTER TOP DISPLAYS

We are excited to introduce to you our latest line-up of new and innovative lighting products with counter top displays.

All of these high quality practical LED lighting products come complete with their own cleverly created point of sale displays, intended to sit directly on the countertop, near the till point - taking up as little space as possible and offering a unique and impulsive 'TRY & BUY' shopping experience.

The displays are designed to help you to sell as much stock as possible by encouraging your customers to interact, discover, and be impressed by the quality and brightness of these innovative and exciting NEBO® lighting products.

ARMOR 3

ARMOR 3, the toughest light, period. Completely waterproof (IPX7) and impact-tested at 20 metres, this incredibly strong light is also unbelievably bright. The ARMOR 3 features a 360 lumen work light and 160 lumen spot light that are both dimmable with programmable power memory. A powerful magnetic tilting base lets you direct light anywhere you need it, and the steel pocket clip allows you to keep this light handy while having your hands free.

3 LIGHT MODES

- Spot Light (160 lumens) - 5 hours / 83 metres
- C·O·B Work Light (360 lumens) - 2.5 hours / 44 metres
- Red C·O·B Work Light (40 lumens) - 1.5 hours / 16 metres

DESIGN

- Non-slip rubber coating
- Waterproof (IPX7) and impact-resistant (20 metres)
- Floats
- Fully dimmable
- Memory Power Setting
- Direct-to-Red feature
- Steel clip
- Powerful tilting magnetic base

OPERATION

- Front-positioned, ON/OFF button; hold to dim

BATTERIES

- Powered by 3 AAA batteries (included)

SPECS

- Weight: 195g
- (H) 146mm x (W) 62mm x (D) 32mm

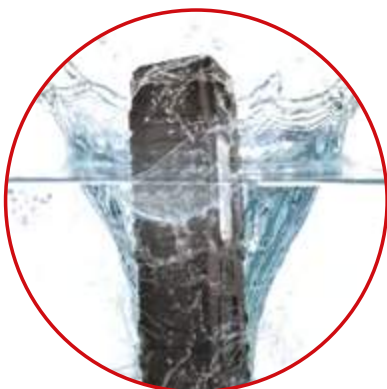

A new innovation in LED technology, C·O·B features smaller, easier clustered LED chips that work together as one lighting module. Because of this design, C·O·B outperforms traditional lighting with more output, less energy consumption and longer LED life span.

NEBO[®] MEASURING LIGHT

Measuring the brightness of light is not a very straight-forward task. Currently, the most common measure of brightness is the lumen rating. Lumens replaced the old wattage-rating system because modern lights consume far less power and are much brighter.

A single lumen is the measure of energy that's released from a light. Imagine putting a transparent bubble around a light bulb and being able to measure all of the energy that flows through the bubble –this is how lumens are measured.

At NEBO[®], we don't live in a bubble and we know that as lighting technology advances, so must the tools used to gauge the performance.

Thus, many of our flashlights are now gauged by lux instead of lumens. Lux isn't a measurement of the amount of energy released — it's a measure of how much light is actually hitting your target.

We've recently introduced flashlights that have advanced optics designed to maximize energy efficiency by tightly focusing the beam of light. So you can light up the mystery across the field without wasting energy by lighting the ground at your feet.

At NEBO[®] we make flashlights that are designed to meet real-life applications and we use advanced engineering to create lighting products that conserve energy yet blast a powerful beam of light.

MEASURING POWER

WATT

Measures power consumption

LUMEN

Measures power exertion

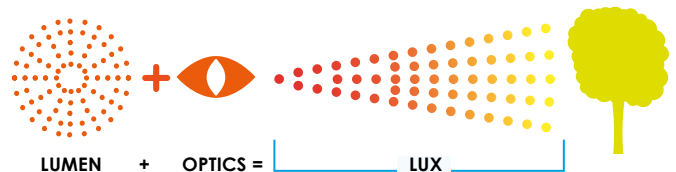

MEASURING BRIGHTNESS

LUX

Measures the amount of light hitting a target

OPTICS

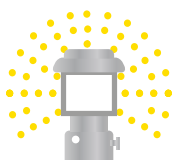

Act like a turbo-charger to help maximise beam brightness

RATING PERFORMANCE BY PRODUCT TYPE

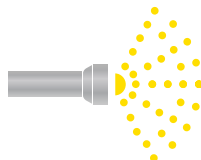

LANTERNS & WORK LIGHTS

These lighting products are designed to illuminate the surrounding area — just like a household light bulb. Since light bulbs are rated in lumens, lantern output is rated using lumens.

CLASSIC FLASHLIGHTS

Classic flashlights illuminate the area directly in front of us — mimicking a light-post fixture, so it's appropriate to also rate these products using lumens.

LONG-RANGE FLASHLIGHTS

These flashlights feature specialised optics with zoom capabilities that are designed to project an intense beam of light at a distance. Lumen ratings ignore the use of specialised optics and fail to provide a clear representation of beam distance or brightness. Lux on the other hand, measures the amount of light actually hitting the target.

PATENTS

C•O•B (Chips on Board)

C•O•B features smaller, easier clustered, circuit board mounted LED chips. Because of the compact design, C•O•B outperforms traditional lighting by up to 50 times the light output per centimetre of light surface.

OPTIMISED CLARITY

Eliminating inconsistencies in light, the OC™ provides intense, clear, pristine light that is easy on the eyes. This technology allows the light beam to be as bright on the edge as it is in the centre.

ARCUS™

Arcus is a new proprietary C•O•B LED technology that allows the shaping of light into full 3D patterns, giving optimal, bright, uniform light exactly where it's needed.

FLEX POWER™

FLEX-POWER™, technology allows the flexibility to use different quantities of batteries to power the light.
